Interior Design Directory of Expertise

The mission of the Directory of Expertise (DX) for Interior Design is to:

- Maintain state-of-the-art technical expertise
- Assist HQUSACE with technical support and coordination with other agencies
- Provide technical design service and advisory assistance to districts and divisions

The Interior Design DX was established in 1988 in response to customer's emphasis on professional interior design and a growing need to support headquarters. The Omaha District hired the Corps' first interior designer and had the largest staff of experienced interior designers at that time. The former center of expertise (CX) was expanded to a regional CX in 1999. The expansion included Kansas City District's interior designers.

Capabilities

Building-Related Interior Design

- Color coordination of materials
- Specifications
- Color boards
- Space planning
- Drawings
- Floor and wall pattern design
- Signage and wayfinding programs
- Finish replacement programs for existing buildings
