Resource Categorization of Nebraska's Eastern Saline Wetlands

Firth, Nebraska

LEGEND

	Category I	Saline wetlands that currently have high value or high potential for restoration.
	Category II	Degraded saline wetlands currently providing limited wetland functions and low wetland values.
	Category III	Freshwater wetland plant communities on saline soils.
	Category IV	Freshwater wetland plant communities on non-saline soils.
	NC	Not categorized, insufficient data for assignment.
	Riverine	
	Lacustrine	

Indicates approximate location of wetlands identified by Nebraska Game and Parks Commission inventory of 1989 but not mapped by the National Wetlands Inventory. Symbols represent point data only and are colored by the appropriate category.

USER NOTES

The wetland categorizations are advisory. They are not final wetland delineations for Clean Water Act, Section 404 or Food Security Act purposes.

Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies concerning specific regulatory programs and proprietary jurisdictions that may affect such activities.
