

Hydrologic Engineering

- Hydrology
- Meteorology
- Water Resource Planning
- Hydraulics
- Sedimentation
- Groundwater
- Water Quality
- Water Control

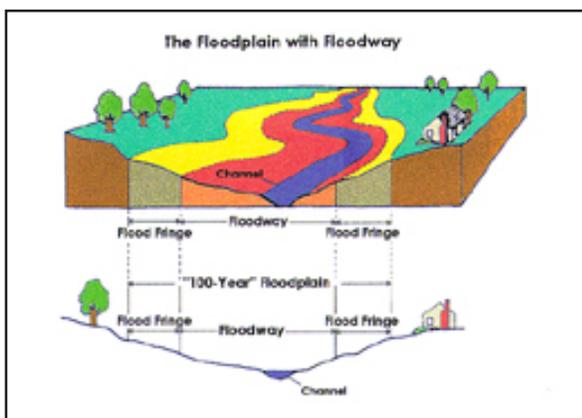

Traditional Hydrologic Engineering services

- Floodplain/floodway analysis
- Watershed modeling and analysis
- Flood control design
- Water supply analysis
- Detention pond design
- Sediment/erosion control design

Specialties and non-traditional services

- Landfill cap drainage design
- Wetland mitigation/restoration design
- Dam safety evaluation and design
- Hydraulic structure design
- Water quality analysis

Support services

- Water quality and sediment sampling
- Stream gaging measurement and gage installation
- Meteorologic station design and installation
- CADD/GIS applications
- Dam safety inspection
- Hydrographic surveying
- Real time hydro-meteorologic data collection
