

# Montana Statewide Umbrella Mitigation Bank

## What

The Umbrella Bank was permitted by the US Army Corps of Engineers in January, 2009 and is approved to sell:

- Wetland and stream mitigation credits for compensatory mitigation under section 404 of the Clean Water Act
- In **every** watershed in Montana

## Why

When impacts to jurisdictional streams and wetlands are unavoidable, a one-time credit purchase from the Umbrella Bank prevents mitigation cost overruns and irrevocably transfers your or your client's perpetual mitigation liability to Montana Mitigation Partners, an experienced and well-established provider of environmental credits.

The Umbrella Bank provides an immediate (at point of sale), straightforward, and cost-effective mitigation solution for residential, commercial, industrial, public infrastructure, and other land development projects throughout Montana.

For information, credit sales, and pricing:
