ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite): Approximately 20 acres of property is included in this jurisdictional determination. Located on the parcel is a 10-acre farmstead, 8 acres of trees, 0.5 acres of roads and 1.5 acres of wetlands. Three isolated wetland basins (0.9-acre, 0.1-acre and 0.5-acre) were identified by the NRCS. The property owner has requested a Converted Wetlands Non-Agricultural Use

(CWNA) determination after it was discovered that the wetlands were converted (drained by ditching) for health and safety reasons. The wetlands are near the drain field of the house located on the farmstead. No fill is proposed, the wetlands will not be cropped and the wetlands may be mitigated in the future. Based on information received from the NRCS, soil surveys and USGS Quad maps, these isolated basins are intrastate and non-navigable. No tie to interstate commerce can be made other than through migratory birds. The basins are not jurisdictional based on the SWANCC ruling.
