Expiration Date: March 18, 2005

15 DAY NOTICE

Reply To:

NEBRASKA REGULATORY OFFICE – WEHRSPANN

8901 SOUTH 154TH STREET, SUITE 1, OMAHA, NEBRASKA 68138-3621

This public notice is to notify the general public, adjacent landowners, and any federal, state and local agencies who received a copy of the public notice issued on January 10, 2005 that the Nebraska Game and Parks Commission (NGPC) has amended the proposed project description. The NGPC requested the amendment after a site visit with the resources agencies on February 25, 2005. The shale hard point outlined in the January 10, 2005 public notice is to be viewed as a temporary erosion control measure with a maximum use of three years. During the three year period, the NGPC and other river interested groups and agencies will work cooperatively to design, fund and implement a long term bio-engineered bank stabilization feature. The temporary feature requested with this permit will be removed if still present after three years. All other portions of the January 10, 2005 public notice will remain the same except for the expiration date which will be March 18, 2005.
