**PUBLIC NOTICE
NOTICE OF 45-DAY EXTENSION TO COMMENT PERIOD
ON DRAFT ENVIRONMENTAL IMPACT STATEMENT
FOR NORTHERN INTEGRATED SUPPLY PROJECT (NISP)**

Notice

The District Engineer, U.S. Army Engineer District, Omaha, Nebraska is announcing a 45-day extension of the comment period to the pending Section 404 permit application and Draft Environmental Impact Statement (EIS) for the **Northern Integrated Supply Project (NISP)**, proposed by the Northern Colorado Water Conservancy District (District), acting by and through the Northern Integrated Supply Project Water Activity Enterprise, 220 Water Avenue, Berthoud, Colorado 80513.

Comment Period Extension

A Notice of Availability of a Draft EIS and Public Notice announcing the receipt and evaluation of a Section 404 permit application from the District for NISP were issued on April 30, 2008. Those notices included an initial 90-day comment period, double the minimum required comment period under the National Environmental Policy Act. Prior to, and during, the current 90-day comment period and public hearings, the Corps received numerous requests to extend, as well as not extend, the comment period on the Draft EIS and permit application. Due to the amount of information contained in the Draft EIS and its supporting documents, the need to afford the public an ample opportunity to provide substantive comments and to facilitate a timely and efficient review process, Omaha District Commander Colonel David C. Press determined that a 45-day extension is warranted and reasonable. The new expiration date for the comment period on the Draft EIS and permit application is **September 13, 2008**.

All written comments on the Draft EIS and replies to the public notice for the permit application should be sent to—
